

# easytherm

## TEMPERATURE MODE

Available on  
Easytherm 1 / 2 / 3.5 / 15 / 30

Temperature Mode can be used to heat a bearing prior to mounting, by placing a temperature sensor on the workpiece and starting the heating cycle. The temperature range for Easytherm is from 0°C (32°F) to 240°C (484°F).

## TIME MODE

Available on  
Easytherm 3.5 / 15 / 30

In addition to Temperature Mode, heating in Time Mode is available on our larger Easytherm induction heaters. Time Mode can be used in production areas where the workpiece to be heated is always of the same specifications.

	Easytherm	1	2	3.5	15	30

- <sup>2</sup> With support rails  
<sup>3</sup> Yoke 7 x 7 not included in standard package

The dimensions shown above are theoretical. In practice there are multiple factors (e.g. workpiece weight, material and placement) that influence the possibility and/or the time needed to heat the workpiece properly.
